He went on to say that the board works hard to keep prices down and cited Mike Allardyce knowledge of an existing pipeline that prevented additional cost to the well on 17. Mike Dopsloff shifted his remarks to his submitted report. Started with the golf course being in excellent condition but noted the tree loss since hurricane Irma and the Pine Beetles. Unfortunately killing Pine Beetles also kills bees and we don't want to do that so the club is continuing to replace trees but it will be a long process. Currently losing about 25 trees a year but the pine sapling planting last year will help and will be continued every two years. He closed his report by informing everyone the greens will be vented next week and asked if anyone had a question. One walking member asked if additional sand boxes could be placed on the course to allow players to refill sand containers for filling divots. Mike Dopsloff said he could do that.
